Profile Summary

I am a motivated and responsible Computer Science student from Puerto Rico seeking to learn as much as possible from my field of study and be able to tackle interesting and complex challenges during my career.

Some of my interests include computer designs, software development and graphical design.

Education

Institution: University of Puerto Rico – Mayagüez

Degree: Bachelor's in Computer Science

GPA: 3.81/4.00

Projects

Discord Bot

- Developed a Discord bot using Python.

Investigation for Methodology on Evolutionary Algorithms

- Developed a Methodology as part of my college course MATE4990 where we proved that Evolutionary Algorithms can be used to predict eye colors in newborns with at least a 90% accuracy rating.

Courses

- COMP 3010: Intro to Prog I
- COMP 3110: Intro to Prog II
- COMP 4016: Computer Organization
- MATE 3171/3172: Precalculus I & II
- MATE 3031/3032/3063: Calculus I, II & III
- MATE 3181: Discrete Mathematics
- MATE 4031: Linear Algebra
